

CNN complexity predicts consistency through co-variation with sparsity
(layer2 embedding: LOO $r = -0.496$, partial r controlling for sparsity = 0.094)

LOO Pearson r (consistency ~ CNN features)

A Prediction accuracy per ResNet50 layer
(blue = $p < 0.05$; light = n.s.)

B Added-variable plots
(blue = sparsity, orange = CNN)
